

NON-JACKETED FLEXIBLE CONDUIT

Aluminum Flex CSA & UL

ANAMET CANADA INC.

Aluminum Flex CSA is a non-jacketed flexible conduit designed for most conventional commercial and industrial applications where a liquid-tight product is not required. Available in trade sizes from 5/16" through 4", in standard coils and long length reels. [CSA approved.](#)

Aluminum Flex UL is similar to the CSA product shown above but with a lighter gauge material in the larger sizes. Available in trade sizes from 3/8" through 2", in standard coils and long length reels. [UL approved.](#)

These products are produced from virgin, high grade raw material only and thoroughly pressure degreased and dried prior to packaging and shipping.
