

LIQUID-TIGHT, METAL CORE FLEXIBLE CONDUIT

CONSEAL CSA & HTC, SEALTITE CSA

ANAMET CANADA INC.

Conseal CSA is a flexible, metal core, liquid-tight conduit designed for use in most standard commercial and industrial applications. Available in trade sizes from 3/8" through 2". Rated 75° C & FT-4. This product is constructed of a galvanized steel, wound core with a PVC jacket. Standard colours are black and grey. Special colours available on request. Long length reels are also available. [CSA Approved](#).

Sealtite CSA is similar to Conseal CSA and is available in trade sizes from 2-1/2" through 4". This is a premium grade of product which is constructed of an interlocked galvanized steel core for greater strength and to eliminate any chance of the core unravelling. This process also provides a smoother outer jacket. Standard colour—black. [CSA and UL Approved](#).

Conseal HTC is similar to Conseal CSA but is supplied with a PVC jacket rated to 105° C. This product is available in trade sizes 3/8" through 2". Consult factory for availability of larger sizes. Standard colour is black.

Trade sizes 3/8" through 2" are sequentially marked for length every metre.

Note: Consult the factory for availability of special colours or long lengths.

Most common sizes of Conseal CSA and Conseal HTC are coiled and shrink-wrapped with re-cycleable clear plastic and colour coded labels by size. This packaging allows the product to be pulled from the center of the package and remain properly coiled until consumed.

Trade sizes 3/8" through 2" are sequentially marked for length every meter.
