

LIQUID-TIGHT, METAL CORE FLEXIBLE CONDUIT

CONSEAL CW-Blue Computer Conduit

ANAMET CANADA INC.

Conseal CW-Blue is a liquid-tight flexible conduit designed specifically for computer feed applications. The blue colour is recognized as a computer feed. This conduit is also wound with an integral copper wire for Electromagnetic Interference Suppression.

Other properties are similar to Conseal-CSA and supplied with similar packaging. Available in trade sizes from 3/8" thru 2", in both standard coils and long length reels. Rated 75°C and FT-4. Larger sizes are available on special order. CSA Approved.

Trade sizes 3/8" through 2" are sequentially marked for length every meter.

Consult factory for availability of special colours.

622620 16110 9	2	15	2.020	2.375	20.000

Note: Consult the factory for availability of special colours or long lengths.

Most common sizes of Conseal CW-Blue are coiled and shrink-wrapped with re-cycleable clear plastic and colour coded labels by size. This packaging allows the product to be pulled from the center of the package and remain properly coiled until consumed.

Trade sizes 3/8" through 2" are sequentially marked for length every meter.
