

# Custom Cut Lengths for OEM Applications

## SPECIFICATIONS:

- Tolerances determined by customer application. Normal tolerances +/- 1/4".
- All products are cleaned and deburred.
- High speed process for up to 2,000 pieces per day.
- Schedules can be specified to reduce lead times and customer inventory.
- Packaging can be customer determined to speed next assembly process.
- Most Anamet products can be cut to custom lengths.
- Cut lengths from 1" and up.
- Some examples of products that can be cut:
  - Alum Flex (CSA or UL)
  - DE-710
  - SL Stainless
  - Any liquid-tight product

## APPLICATIONS:

- Any OEM harness manufacturer for the lighting, appliance or furniture industry.
- Any application where a large number of same length pieces of conduit.
- Modular furniture manufacturing.
- Lighting manufacturing.

Cutting conduit in-house for wiring harnesses can be difficult and time consuming. Anamet Canada can provide finished cut lengths, ready for assembly into your harness. Your assembly time can be greatly reduced.

Many industries have applications for standardized cut lengths. These include: Lighting manufacturers, furniture manufacturers, Appliance manufactures, and HVAC manufacturers. Any place that you constantly use the same length conduit is a good choice for custom cut lengths.

## Products that this service might apply to:

CSA Liquid tight  
Sealtite® conduits  
Aluminum conduit  
(CSA or UL RW)

DE steel conduit  
DSL steel conduit,  
SL or UI Cap Stainless Steel  
NMUA non-metallic conduit.
